

5. Choose the device you need to upgrade and click the upgrade button.

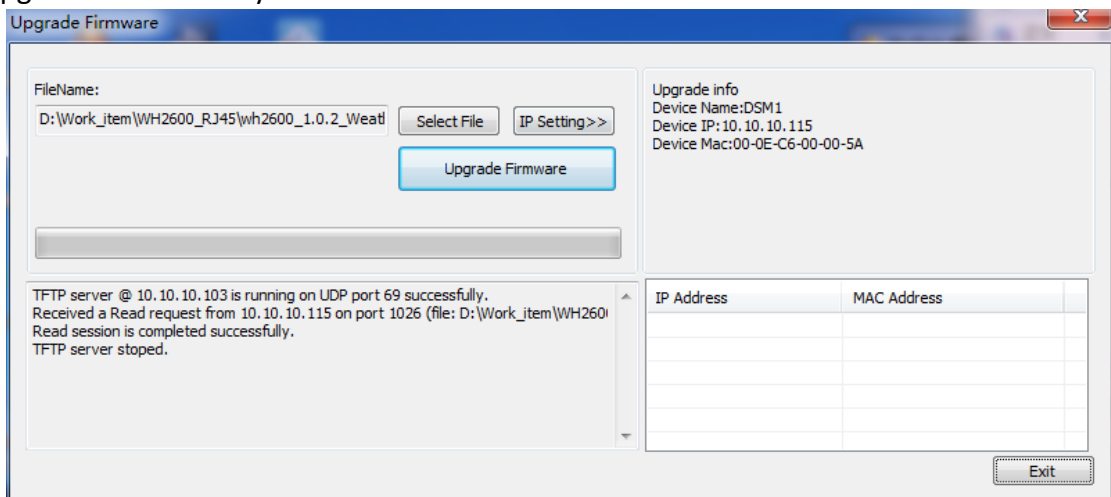

6. Select file, find WeatherSleuth Firmware v2.1.9, press Upgrade Firmware

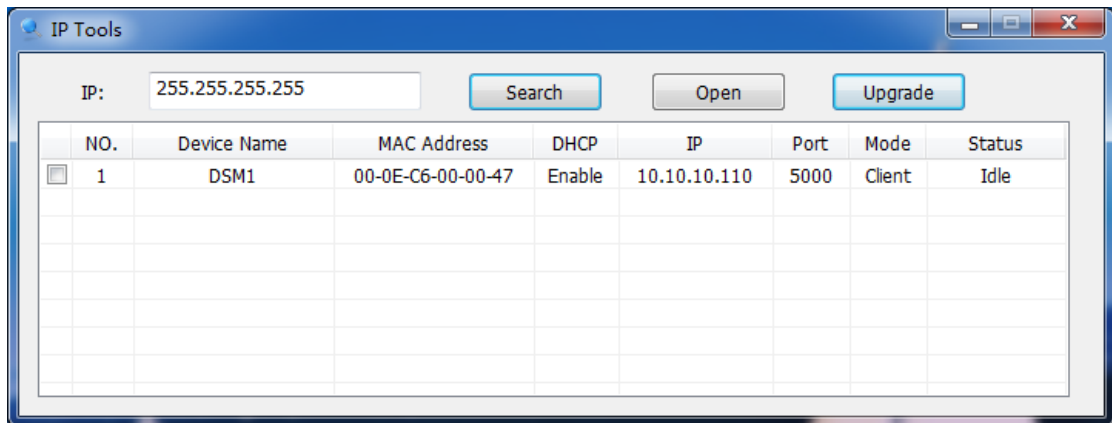

7. Upgraded successfully.

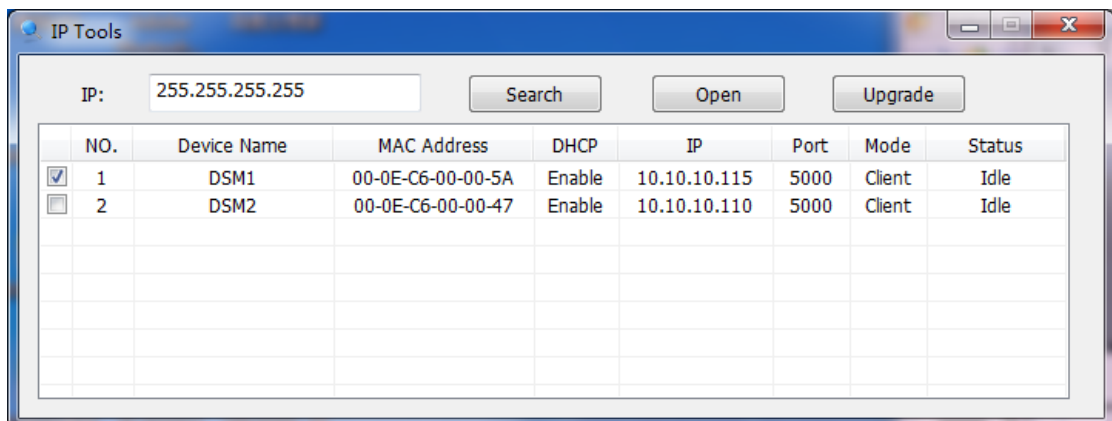

If the upgrade fails, please follow the below steps:

1. Open IP Tools, and select the Weather Sleuth host IP
2. In the below window, click the Search button. The device that failed to upgrade will not show on the device list. For example if MAC: 0-0E-C6-00-00-5A failed to upgrade - it will not show on the below list:

Compared with the below successful upgrade window device list:

3. If the device doesn't show on the list, user to click upgrade button directly with no need to choose the device.
